## **Norris Public Power District Makes Progress On Restoring Outages**

Norris Public Power District continues to restore power associated with the winter storm that struck southeast Nebraska on Monday.

As of 6:30 a.m. the District estimated less than 200 customers were without power. Areas still without power include the following:

- South of Highway #8 between Highway #112 and Highway #77. We are anticipating this area will be restored today.
- A small area north and west of Odell. We are anticipating this area will be restored today.
- South of Beatrice between Linden Rd and Blue Springs on each side of Highway #77. We are anticipating this area will be restored today.
- An area between Virginia and Liberty and east of the Rockford road. We have several crews working in this area; however this seems to be the area with the most damage so there is a good chance that everyone may not be restored in this area today.

We are also aware that there are numerous individual services that are disconnected and will require additional work. We will concentrate on these individual services once the majority of the other areas have been restored.

We appreciate everyone’s patience with the restoration efforts. The District currently has over 85 men in the field working on restoration efforts from eight different public power districts as well as the Beatrice Board of Public Works and Schmader Electric.
